Keyword Index

Alternative energy sources
Expansion planning, Generation system reliability 311

Cluster
Reduced network, External equivalent 301
Consumer modelling
Spot-pricing, Load mangement 35
Contingency analysis
Linearized load flow, Voltage security 11
Control
Excitation systems, Turbo-alternators 73
Control systems load management
Distribution system automation 197
Critical clearing time
Tangent hypersurfaces, Transient security 399

Data gathering and analysis
On-line computer systems, Software design 229
Databases
Software engineering, Knowledge-based systems and object-oriented systems 157
Decomposition
System modelling, Parallel processing 73
Decomposition methods
Hydro-thermal scheduling 175
Design of PSS
Power system stabilizers, Participation factors 355
Diagnosis expert systems
Failure detection, Power plant chemistry 251
Digital protection
Filtering, Power Systems 391
Digital simulation
Long term system dynamics, Dynamic stability 235
On-line computer systems, Software design 423
Distance to an uncontrollable pair
Modal controllability, Placement of controllers 243
Distribution system automation
Control systems load management 197
Distribution systems planning
Modelling and simulation techniques, Fuzzy mathematical programming 191
Dynamic modes of instability
Voltage stability, Hopf bifurcation 83
Dynamic stability
Long term system dynamics, Digital simulation 235
Dynamic voltage stability
Load modelling, Power system bifurcation 329
Dynamics
Power systems, Voltage stability 287

Economic load dispatch
Multiobjective optimization, Sensitivity 383
Eigenvalue computations
Voltage stability, Maximum loadability 221
Electricity tariffs
Spot-pricing, Load management 23
Emergency control
On-line control strategies, Transient stability 269
Emergency state control
Optimal-aim strategy, Interconnected electric power systems 97
Environmental dispatch
Optimum operating strategies 17
Excitation systems
Control, Turbo-alternators 73
Expansion planning
Generation system reliability, Alternative energy sources 311
Expert system
Restoration support, Fuzzy logic 183
Expert systems
Network analysis, Security enhancement 49
Power systems 259
External equivalent
Reduced network, Cluster 301

Failure detection
Diagnosis expert systems, Power plant chemistry 251
Filtering
Digital protection, Power systems 391
Fuzzy logic
Restoration support, Expert system 183
Fuzzy mathematical programming
Modelling and simulation techniques, Distribution systems planning 191

GTO-based reactive power compensations
HVDC converters, Isolated systems 111
Generation system reliability
Expansion planning, Alternative energy sources 311

HVDC converters
GTO-based reactive power compensations, Isolated systems 111
Hopf bifurcation
Voltage stability, Dynamic modes of instability 83
Hydro-thermal scheduling
Decomposition methods 175

Interconnected electric power systems
Emergency state control, Optimal-aim strategy 97
Interconnected lines
Maximum transmission efficiency 349
Isolated systems
HVDC converters, GTO-based reactive power compensations 111

Knowledge-based systems and object-oriented ystems
Software engineering, Databases 157

Linearized load flow
Contingency analysis, Voltage security 11
Load management
Spot-pricing, Electricity tariffs 23
Spot-pricing, Consumer modelling 35
Load modelling
Dynamic voltage stability, Power system bifurcation 329
Long term system dynamics
Dynamic stability, Digital simulation 235
Long-term dynamics
Newton–Raphson technique, Power-system simulation 5
Lyapunov mehod
Short-term dynamics, Transient stability 339

Maintenance scheduling
Modelling of energy systems, Multiobjective programming 211
Maximum loadability
Voltage stability, Eigenvalue computations 221
Maximum transmission efficiency
Interconnected lines 349
Modal controllability
Distance to an uncontrollable pair, Placement of controllers 243
Modelling and simulation techniques
Distribution systems planning, Fuzzy mathematical programming 191
Modelling of energy systems
Multiobjective programming, Maintenance scheduling 211
Multiobjective optimization
Sensitivity, Economic load dispatch 383
Multiobjective programming
Modelling of energy systems, Maintenance scheduling 211
Multiple loadflow solutions
Voltage stability, Preventative control 117
Multivariable control
Voltage/reactive power stability and control, Secondary voltage control 167

Network analysis
Power system dynamics, Phasors 365
Security enhancement, Expert systems 49
Network methods
Real-time simulation, Power system dynamics 145
Newton–Raphson technique
Long-term dynamics, Power-system simulation 5

On-line computer systems
Data gathering and analysis, Software design 229
Software design, Digital simulation 432
On-line control strategies
Emergency control, Transient stability 269
Optimal control, Superconducting magnetic energy storage 291
Optimal control
Superconducting magnetic energy storage, On-line control strategies 291
Optimal-aim strategy
Emergency state control, Interconnected electric power systems 97
Optimum operating strategies
Environmental dispatch 17

Parallel processing
System modelling, Decomposition 73
Participation factors
Power system stabilizers, Design of PSS 355
Phasors
Power system dynamics, Network analysis 365
Placement of controllers
Distance to an uncontrollable pair, Modal controllability 243
Power plant chemistry
Diagnosis expert systems, Failure detection 251
Power system bifurcation
Dynamic voltage stability, Load modelling 329
Power system dynamics
Network analysis, Phasors 365
Network methods, Real-time simulation 145
Power system stability
Robust stability, Steady-state stability 321
Participation factors, Design of PSS 355
Power systems
Digital protection, Filtering 391
Expert systems 259
Dynamics, Voltage stability 287
Power-system simulation
Long-term dynamics, Newton–Raphson technique 5
Preventative control
Voltage stability, Multiple loadflow solutions 117

Real-time simulation
Network methods, Power system dynamics 145
Reduced network
Cluster, External equivalent 301
Restoration support
Expert system, Fuzzy logic 183
Robust stability
Power system stability, Steady-state stability 321

Scheduling
Special events demand forecast, Software design 377
Secondary voltage control
Voltage/reactive power stability and control, Multivariable control 167
Security assessment
Short-term system dynamics, Transient stability 105
Security enhancement
Network analysis, Expert systems 49
Sensitivity
Multiobjective optimization, Economic load dispatch 383
Short-term dynamics
Transient stability, Lyapunov method 339
Short-term system dynamics
Transient stability, Security assessment 105
Single-machine infinite-bus systems
Synchronous generator stabilizer 91
Software design
On-line computer systems, Data gathering and analysis 229
On-line computer systems, Digital simulation 377
Scheduling, Special events demand forecast 377
Software engineering
Databases, Knowledge-based systems and object-oriented systems 157
Special events demand forecast
Scheduling, Software design 377
Spot-pricing
Load management, Electricity tariffs 23
Load management, Consumer modelling 35
Steady-state stability
Power system stability, Robust stability 321
Superconducting magnetic energy storage
Optimal control, On-line control strategies 291
Synchronous generator stabilizer
Single-machine infinite-bus systems 91
System modelling
Decomposition, Parallel processing 73

Tangent hypersurfaces
Transient security, Critical clearing time 399
Transient security
Tangent hypersurfaces, Critical clearing time 399
Transient stability
Short-term system dynamics, Security assessment 105
On-line control strategies, Emergency control 269
Short-term dynamics, Lyapunov method 339
Turbo-alternators
Control, Excitation systems 73

Voltage security
Linearized load flow, Contingency analysis 11
Voltage stability
Dynamic modes of instability, Hopf bifurcation 83
Preventative control, Multiple loadflow solutions 117
Power systems, Dynamics 287
Voltage/reactive power stability and control
Secondary voltage control, Multivariable control 167
